## ACCEPTABLE USE POLICY

### *Terms and Conditions for Student Use of the Internet, District Network and Technology for Grades K-5*

Adopted 06-09-97 Revised 03-05-12

#### Introduction

---

---

The Blind Brook-Rye School District is pleased to offer its students, faculty and staff access to the Internet. The Internet, a global electronic information infrastructure, is a connection of networks used by educators, business, government, the military and other organizations. The Board of Education strongly believes in the value of telecommunications and recognizes the potential of such to support our curriculum, students, faculty and staff.

The Internet is a fluid environment. In general, electronic traffic passes freely in a trusting atmosphere. But with such access comes the availability of material that may not be appropriate in a school setting. It is our goal to provide users with the understanding and skills needed to discriminate among information sources, to identify information appropriate to their age and developmental levels, and to evaluate and use information to meet their educational objectives.

This policy is designed to facilitate and set guidelines for exploring and using the Internet, the district network applications and web based instructional and research tools, in a responsible, ethical and legal manner. Of necessity, it places the primary responsibility for proper conduct on the user. Use of the School District's local network and Internet facilities in contravention of the following guidelines will result in cancellation of the user's account as determined by a building administrator and possible legal intervention when applicable.

Please refer to Board Policy #7315 on the District website for a full accounting of guidelines and regulations regarding student use of District technology.

## Terms and Conditions for Student Use

### A. I understand and grant permission for my child

\_\_\_\_\_ to access the Internet, District Network and other District technology and have discussed with him/her the requirement that he/she abide by the following Rules and Code of Ethics:

5. Malicious use of the Internet or the network to develop programs that harass other users or infiltrate a computer or computer system and/or damage the software components of a computer or computer system (e.g., create viruses) is prohibited.

2. I recognize that software is protected by copyright laws; therefore, my child will not make copies of software found on school computers either by copying them onto my own diskettes, CD's or onto other computers through electronic mail or bulletin boards; and will not give, lend, or sell copies of software to others unless they have the written permission of the copyright owner or unless the original software is clearly identified as shareware or in the public domain. Attributions of authorship will follow the same copyright rules for material obtained via the network.
3. I recognize that electronic copyrighted text is protected by copyright laws; therefore, my child will not cut and paste or photograph electronically with my cell phone this copyrighted text into my reports, take home exams, school related documents without correctly referencing the copyrighted source. Attributions of authorship will follow the same copyright rules for material obtained via the network.

Any violation of District policy and rules may result in loss of District-provided access to the Internet and network access. Additional disciplinary action may be determined at the building level in keeping with existing procedures and practices regarding inappropriate language and behavior. Legal intervention may occur when applicable, including but not limited to network tampering, hacking and intentional equipment theft or damage.
